TANNERY MACHINES AND SPARE PARTS

## Impact D-1

---

The use of this cake machine allows to reduce the volume of buffing powders to maximum 80%, gaining noticeable savings in transportation costs and material dispersion.

IMPACT D-1 has been built to obtain 1 m<sup>3</sup>/h maximum production.

This machine has been conceived in a simple way, to work without maintenance for long periods and is cheap in price.

On the side of the powder gathering tank there is a porthole that allows the level of the material to be checked.

A probe can be supplied on request, allowing the IMPACT D-1 to work only if there is material to be compacted.

### Features

- size (mm): 1200 × 1000 × 1300 h (including the tank)
- maximum powder reduction: 1:20
- net weight of the machine: 350 kg
