

HARDY

RE-BLADING

Re-blading is essential to ensure the quality of the finished product.

The quality of the housekeeping, maintenance, re-blading and grinding will all have a profound effect on the quality of the shave finish and the yield achieved.

GET THE BEST FROM YOUR BLADES

THE BEST QUALITY

We use the highest quality tools and copper caulk to provide the best result possible, along with a team of experienced staff.

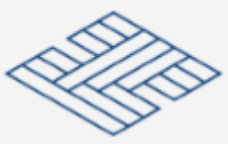

EXPERIENCED WORKFORCE

With over 160 years in the making, we have picked up the most qualified and capable workforce along the way.

FAST DELIVERY

With easy and close access to the motorway network, fast shipping is guaranteed.

HARDY

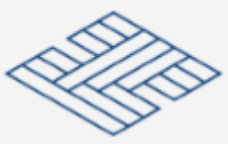

HARDY

We now have the capacity to offer a full re-blading service.

The cylinders re-bladed by us are highly inspected to guarantee the optimum quality which will offer the precision needed to cut leather.

We start by de-blading the current cylinder, taking extra care not to damage the grooves of the blade. Next comes preparing the cylinder for the new blade by removing any debris, rust or caulk. Once the cylinder has been fully prepared, we can perform the re-blade to our precise Hardy standards.
